**Completed Research and Training Grant Support**

NIH/NHLBI 1R01 HL035189, Isobel Contento, PhD (PI), 10/01/85 – 9/30/90

*Study of Childhood Activity and Nutrition*

The objective of this project was to identify the determinants of diet and physical activity behaviors in children that place them at increased risk for coronary heart disease, and to develop guidelines and recommendations that could be useful in planning and implementing health promotion interventions designed to reduce population-wide risk factors.

Role: Co-Investigator (Year 01 only)

NIH/NIAMS 1P60 AR038520, Charles Christian, MD (PI), 7/01/88 – 6/30/93

*Multipurpose Arthritis and Musculoskeletal Diseases Center*

The goals of this project were to improve the care of patients with arthritis and musculoskeletal disorders by developing and supporting new research initiatives that would stimulate scientific advances in the diagnosis, prognosis, treatment, and prevention of disease; to improve patients' functional status and ability to cope; and to meet emerging needs in patient and public education.

Role: Assistant Director, Administrative Core; Associate Director, Education, Epidemiology and Health Services Research Methodology Core; and Co-Investigator

Robert Wood Johnson Foundation, Mary Charlson, MD (PI), 9/01/91 – 8/31/96

*Sociocultural and Organizational Barriers to Care for Potentially Disabling Arthritis in the Black and Latino Communities*

The objective of this population-based survey was to document the prevalence and severity of symptomatic hip or knee arthritis as well as prevailing community knowledge and attitudes towards treatments for arthritis in three community districts in Manhattan, one predominantly black, one Latino, and one white.

Role: Co-Investigator

NIH/NIAMS 2P60 AR038520, Robert Kimberly, MD (PI), 7/01/93 – 6/30/98

*Multipurpose Arthritis and Musculoskeletal Diseases Center*

The goals of this project were to improve the care of patients with arthritis and musculoskeletal disorders by developing and supporting new research initiatives that would stimulate scientific advances in the diagnosis, prognosis, treatment, and prevention of disease; to improve patients' functional status and ability to cope; and to meet emerging needs in patient and public education.

Role: Assistant Director, Administrative Core; Associate Director, Education, Epidemiology and Health Services Research Methodology Core; and Co-Investigator

NIH/NIAMS 2P60 AR038520, Robert Kimberly, MD (PI), 7/01/93 – 6/30/98

*Multipurpose Arthritis and Musculoskeletal Diseases Center*

*Education, Epidemiology and Health Services Research Program Project 4 – A Randomized Trial of Self-Efficacy and High Intensity Strength Training to Improve Postoperative Rehabilitation of Hip Fracture Patients*

The goal of this study was to evaluate the overall impact of a novel, multiple-component intervention program to reduce poor functional outcomes and institutionalization following hip fracture.

Role: Principal Investigator

Agency for Healthcare Research and Quality T32 HS00066-01, Mary Charlson, MD (PI), 9/30/94 – 6/29/99

*Health Services Research Training Grant*

The major goal of this project is to prepare post-residency physicians who will conduct methodologically rigorous health services research in a multidisciplinary environment that will enable them to develop and implement solutions to the nation's pressing health care problems.

Role: Core Faculty

Arthritis Foundation Clinical Sciences Grant, Hirsch Ruchlin, PhD (PI), 7/01/95 – 6/30/98

*A Cost-Benefit Analysis of a Randomized Trial of Self-Efficacy and High Intensity Strength Training to Improve Postoperative Rehabilitation of Hip Fracture Patients*

The goal of this project was to evaluate the cost-benefits of the overall impact of a novel, multiple-component intervention program to reduce poor functional outcomes and institutionalization following hip fracture.

Role: Co-Principal Investigator

NIH/NHLBI 5R01 HL062161, Mary Charlson, MD (PI), 4/01/99 – 3/31/03

*Improving Health Behavior and Outcomes after Angioplasty: The Healthy Behaviors Trial*

The major goal of this project is to compare the efficacy of two strategies of motivating behavioral change—a standard approach vs. an experimental biologic age approach—in improving two-year outcomes among 660 coronary artery disease patients who have undergone angioplasty with or without stents.

Role: Co-Principal Investigator and Lead Behavioral Scientist

Agency for Healthcare Research and Quality T32 HS00066-05, Mary Charlson, MD (PI), 9/30/99 – 9/29/04

*Health Services Research Training Grant*

The major goal of this project is to prepare post-residency physicians who will conduct methodologically rigorous health services research in a multidisciplinary environment that will enable them to develop and implement solutions to the nation's pressing health care problems

Role: Core Faculty

NIH/NHLBI 1R01 HL069408, Godwin Ogedegbe, MD (PI), 9/26/01 – 8/31/05

*Motivational Interviewing in Hypertensive African Americans*

The major goal of this project is to evaluate among 150 hypertensive African-American patients with poorly controlled hypertension followed in a community-based primary care practice whether motivational interviewing is more effective than usual care in achieving adherence to prescribed antihypertensive medications at 12 months.

Role: Co-Investigator and Lead Behavioral Scientist

NIH/NHLBI 1N01-HC-25096-01, Mary Charlson, MD (PI), 9/30/02 – 9/30/07 (with no-cost extension to 6/30/08)

*Translational Behavioral Science Research Consortium*

The major goal of this project is to support innovative research designed to facilitate adoption and maintenance of behavior change in the secondary prevention of adverse outcomes among patients with chronic cardiopulmonary diseases.

Role: Co-Investigator and Lead Health Education Scientist

Agency for Healthcare Research and Quality 5T32 HS00066-10, Mary Charlson, MD (PI), 7/01/03 – 6/30/08

*Health Services Research Training Grant*

The major goal of this project is to prepare post-residency physicians who will conduct methodologically rigorous health services research in a multidisciplinary environment that will enable them to develop and implement solutions to the nation's pressing health care problems.

Role: Associate Director and Core Faculty

Veteran's Administration IIR 04-170, Sundar Natarajan, MD (PI), 1/01/06 – 12/31/08

*A Behavioral Intervention to Improve Hypertension Control in Veterans*

The major goal of this project is to determine whether a stage-matched intervention is effective in lowering blood pressure at 6 months compared to usual care or an attention placebo intervention in veterans with hypertension.

Role: Co-Investigator and Lead Behavioral Scientist

NIH/NCCAM T32 AT001161-01A1, Mary Charlson, MD (PI), 7/01/04 – 6/30/09

*Complementary and Integrative Medicine Training Program*

The major goal of this project is to prepare post-residency physicians with knowledge, skills, and experience to conduct scientifically rigorous research in complementary and integrative medicine.

Role: Core Faculty

NIH/NHLBI R01 HL075893, Carol Mancuso, MD (PI), 1/10/05 – 12/31/09

*Trial of Asthma Patient Education in the Emergency Room*

The major goal of this project is to assess the effectiveness of an intervention involving education, enhanced self-efficacy, and enhanced asthma-related social support in improving the quality of life outcomes among 214 adult patients with asthma treated in the emergency department.

Role: Co-Investigator and Lead Behavioral Scientist

NIH/NHLBI R01 HL087301-01A2, Godwin Ogedegbe, MD (PI), 9/01/09 – 8/30/11

*Practice-Based Trial to Improve Blood Pressure Control in Blacks with Hypertension*

The major goal of this project is to test the effectiveness of a practice-based comprehensive therapeutic lifestyle intervention, delivered through group-based counseling and motivational interviewing in a two-arm, randomized controlled trial in 500 poorly controlled hypertensive African-Americans, who receive care in community-based primary care practices.

Role: Co-Investigator

Agency for Healthcare Research and Quality 5T32 HS00066-15, Mary Charlson, MD (PI), 7/01/08 – 6/30/13

*Health Services Research Training Grant*

The major goal of this project is to prepare post-residency physicians who will conduct methodologically rigorous health services research in a multidisciplinary environment that will enable them to develop and implement solutions to the nation's pressing health care problems.

Role: Associate Director and Core Faculty

OSI Europe Foundation Contract 80002399, John P. Allegrante, PhD, (PI), 8/01/09 – 7/31/13

*Higher Education Support Program Academic Fellowship Program*

The major goal of this project is to provide specialized consulting and assist the Kazakhstan School of Public Health with capacity-building through the Open Society Institute's International Higher Education Support Program in Central Asia and Mongolia.

Role: International Scholar

ONC DHHS No. 1U24OC000003-01, Rita Kukafka, DrPH (PI), 4/02/10 – 4/01/12

*Columbia University Curriculum Development Center*

The major goal of this project is to develop educational materials for key health information technology (IT) topics to be used by 70 community colleges participating in a consortia program designed to support training and development of more than 50,000 new health IT professionals in the United States.

Role: Member, Advisory Board, and Principal Investigator of the Teachers College Subcontract

Rannis Icelandic Research Fund Grant of Excellence, Jack James, PhD (PI), 1/01/11 – 12/31/13

*Multilevel Biobehavioural Analyses of Adolescent Reactivity to Stress*

The goal of this project is to conduct a multilevel analysis of the role of genetic, psychophysiological, and psychosocial factors in adolescent reactivity to stress.

Role: Co-Principal Investigator

Rannís Icelandic Research Fund Grant, Inga Dora Sigfusdottir, PhD (PI), 1/01/12 – 12/31/14

*Multilevel Analysis of Risk and Protective Factors for Risky Behaviours in Adolescents*

The goal of this project is to improve our understanding of the social factors that influence the development of risk behaviour among adolescents, including substance use, suicidal behaviour, unprotected sex, self-inflicted harm, and delinquency.

Role: Co-Principal Investigator

### **Current Research and Training Grant Support**
